Additional SIS Alert Document Views

Additional SIS Alert Document Views
October 8, 2019

Many districts use the SameGoal Alerts & Document Viewer Integration with their student information systems, including PowerSchool, Infinite Campus and eSchoolPLUS. Currently, when the integration links through to an "at a glance" page, say for an IEP, districts have provided feedback that it would be helpful to additionally show the associated full document.

Effective 10/11/2019, the SameGoal document viewer includes links to the full document and all associated alternate views and attachments in the document dropdown menu. For example, if an alert currently shows an "IEP at a Glance", users now have the option to also view the full IEP. This update includes all existing configured alert types (e.g. IEP, SP, WEP, etc).
