- December 13, 2023: Additional Supported Filed Type

Previously, users were only able to upload PDF attachments. Because of this, the type of content that could be uploaded was limited and users had to do extra work to convert files into a PDF format.

Now, we've made it possible to upload several different file types. In addition to PDF files, users can now upload the following file types:

- .doc
- .xls
- .jpeg
- .docx
- .mp3
- .jpg
- .xlsx
- .mp4
- .png

 **Tip** .pdf, .mp3, .mp4, .jpeg, .jpg, and .png attachments can all be previewed directly within SameGoal before downloading or printing.

 **Tip** When printing a document with attachments, only .pdf files will be included.
