

District-to-District Transfer Notifications

District-to-District Transfer Notifications
December 6, 2024

Based on feedback from users, we will soon be adding notifications for district-to-district transfer events.

These notifications will make it easier to see when documents are shared by other districts, streamlining the district-to-district transfer process, and will help to ensure that transfer students start receiving necessary support at their new school as soon as possible.

When documents are transferred between districts via district-to-district transfer, the receiving user in the receiving district will get a notification that tells them who shared the documents and which district the documents came from.

District-to-District Transfer notifications will fall under the **Document Share** notification type and thus will be sent via the preferred method(s) for **Document Share**.
