

Guardian Activity Notifications

Guardian Activity Notifications
June 28, 2024

The wait is finally over! Document owners will now be notified when guardians make document edits.

With the Plus or Pro edition of SameGoal, users can share documents with parents electronically and parents are able to edit parent-specific fields as well as electronically sign documents. Now when a guardian edits a document that's been shared with them, all document owners will get a notification in SameGoal.

 **Tip** Any activity within a 5 minute window will be included in a single notification.

You can also expect to see additional notification types added in the future!
