

## IP Migration

*Planned IP Migration*  
*January 24, 2025*

As more districts continue to adopt SameGoal, we have outgrown our existing IP address space. Therefore, on 7/1/25, all SameGoal services will transition to a larger IP block. For most districts this change will be completely transparent to end users and no changes will be required.

However, depending on district IT policies, some districts may need to add our new IP blocks to one or more allow lists. Configurations that might require updates include:

- Firewalls
- Content filtering systems
- SFTP or API-based integrations

**Please confirm with your IT department if any changes are necessary for your district.**

We will continue to use the following ranges until **6/30/25**:

- 204.93.176.128/27 [204.93.176.128 - 204.93.176.159]
- 50.31.136.224/27 [50.31.136.224 - 50.31.136.255]

Starting **7/1/25**, the new IP ranges will be:

- IPv4: 199.30.216.0/22 [199.30.216.0 - 199.30.219.255]
- IPv6: 2607:4440::/32
