

IP Migration

Planned IP Migration
January 24, 2025

As more districts continue to adopt SameGoal, we have outgrown our existing IP address space. Therefore, on 7/1/25, all SameGoal services will transition to a larger IP block. For most districts this change will be completely transparent to end users and no changes will be required.

However, depending on district IT policies, some districts may need to add our new IP blocks to one or more allow lists. Configurations that might require updates include:

- Authentication Providers (OIDC, LDAP, ClassLink, etc)
- Firewalls
- Email systems
- Content filtering systems
- SFTP or API-based integrations

Please confirm with your IT department if any changes are necessary for your district.

Starting **7/1/25**, the new IP ranges will be:

- IPv4: 199.30.216.0/22 [199.30.216.0 - 199.30.219.255]
- IPv6: 2607:4440::/32
