Validation, Enrollment Status and Unified All Enhancements

Validation, Enrollment Status and Unified All Enhancements
February 12, 2020

We recently released some exciting new features and updates. See below for the latest SameGoal enhancements!

- **Real-time Validation and Validation Mode** (blog post): Users can now see and resolve errors in real time while completing documents. Once they are finished, use validation mode to catch any errors that may have been missed. Find the details on the support page.

- **District Enrollment Status** (blog post): District enrollment status allows districts to track student enrollment status. Users can see enrollment status badges, view inactive students, and have more granularity in administrative reports. More details on the support page.

- **Unified All** (blog post): saves time when working in documents. Eliminate extra steps by going from section to section without clicking additional section titles or tabs.
