

PowerSchool Integration

*Additional PowerSchool Integration
September 20, 2024*

We now have an additional **alerts/document viewer** integration with PowerSchool.

Alerts/document viewer integrations set program-specific flags in PowerSchool when students have a complete, currently effective document in SameGoal, and they enable staff to view students' documents directly in PowerSchool by clicking on the program flag.

This additional integration uses PowerSchool's API, which does not require MFA. Because of this, if districts that use MFA are experiencing issues with their current integration, we recommend switching to this additional PowerSchool integration as it is compatible with PowerSchool's enhanced UI.

Instructions to set up this new integration can be found on our technical guide.
