

Skyward Integration

Skyward Integration

August 2, 2022

SameGoal integrates with most student information systems-integration), allowing the two systems to pass student information back and forth. We are happy to announce that we have a new streamlined integration setup with Skyward SMS 2.0. This streamlined integration will allow districts that use Skyward as a SIS to add nightly demographic information, as well as set up alerts in Skyward to view documents authored in SameGoal.

To enable the Skyward integration visit the [Skyward integration technical guide](#).

This new integration is available for any district that uses Skyward SMS 2.0.
