Doc Viewer Integration

Skyward SMS Doc Viewer Integration
September 19, 2025

We're very excited to share that we now support a **document viewer** integration with Skyward SMS! Document viewer integrations enable staff to view a student's documents directly in Skyward.

Integration Configuration

Before the document viewer integration can be used, an admin user will need to set up the integration. Instructions to configure this new integration can be found on our technical guide.

View a Document in Skyward

Staff who have access to view student attachments in Skyward will be able to see students' currently effective plan documents.

Steps *To view a student's document in Skyward:*

1. While on a student's profile, click on **Attachments**.
2. In the attachments table, you'll see a description of the plan with the start and end date, and it will say it was entered by SameGoal.
3. While selecting the desired attachment, click **View Attachment** on the right.
4. While on the document viewer screen, you can switch between additional views using the **Document** dropdown in the top right.
5. You may also choose to print or download the document.
