

State Customization

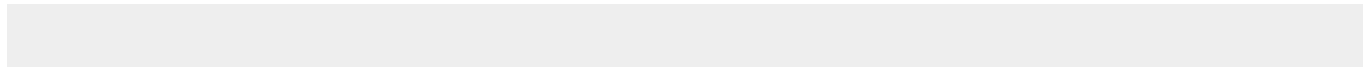

The mission of SameGoal's state customization team is to design the workflows and configure the SameGoal platform to best fit the needs of each Special Program in each state we serve.

This includes the creation of forms, validation rules, program participation tracking, deadlines, administrative reports, and state reporting extracts.

This team incorporates legal requirements, published state guidance, educator workflows, and district feedback into a best-in-class educator experience that supports the needs of districts on the ground.

Meet the Team

Alicia - Special Programs Analyst
