FD record

The Student Attributes-Effective Date (FD) Record uses "open"/"close" records. In other words, one event "opens" a new record and provides providing an end date. These record semantics are challenging, since (1) open/close events are often recorded in disparate systems; (2) ever means the new SIS needs bootstrapped records to start from; and (3) the FD record contains data elements known by different groups of pe etc).

The role of Special Education and Section: 504 in the FD record is namely to track changes to FD130 "Disability Condition" and FD140 "Studer SameGoal exports Special Education records for the following cases as "open" records and provides the following guidance to consumer sys elements, the value of the other element will be carried forward from the immediately previous record. If changes to both FD130 and FD140 open record.
