Services Plans

When a student is attending private school but requires special education services, you may create a **Services Plan** for them.

When a student has a **Services Plan**, they have access to some special education services, but not all of the same services as public school students.

The **Services Plan** form is very similar to an **Individualized Education Program** but without the following sections:

- State and Districtwide Assessments
- Consideration of Least Restrictive Environment
- End of School Year (ESY) Services
- Assurances

To fill out a **Services Plan**, follow the workflow to fill out an IEP, but skip the sections listed above.

Tip To amend or revise a Services plan, use the same amendment or revision process as an IEP.
