samegoal

Behavior Intervention Plan

While there is little legal stipulation as to what content needs to appear in a BIP, TEA provides technical assistance document Behavior Supports and Guidance for Students with Disabilities. Page 31 summarizes main BIP components expected as:

- Description of interfering behavior
- Function(s) of behavior
- Replacement behaviors
- Antecedent/prevention strategies
- Instructional strategies
- Responses to behavior
- Reinforcement

SameGoal's BIP includes all components above and was also designed with the example shared by the TX Deaf Blind Project in mind (note: pre-dates most recent TEA guidance).
