Cyberduck

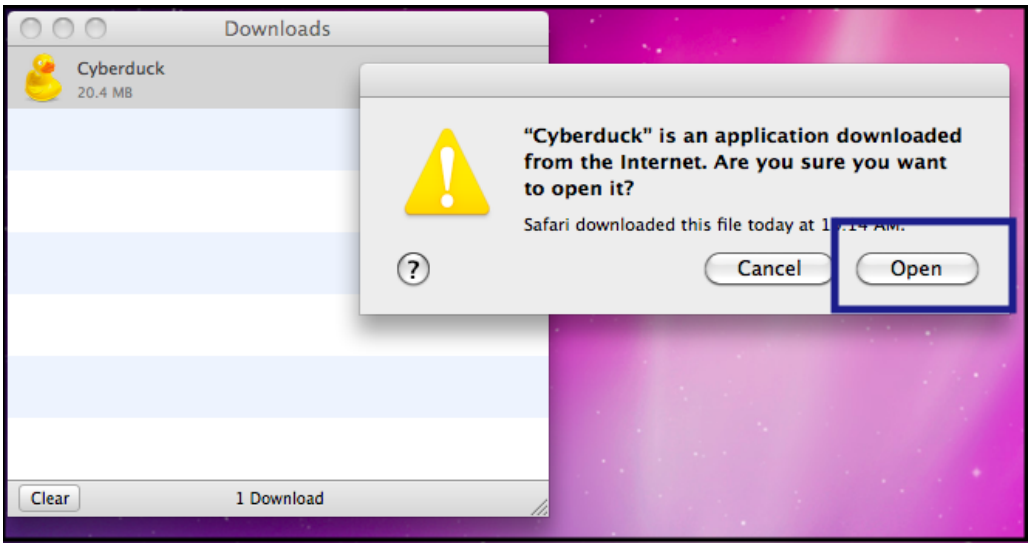
Cyberduck is a GUI program recommended for connecting to your SFTP account manually from time-to-time and one-time uploads.

- Supported platforms: Mac™
- Connection requirements: Use your OpenSSH-style public key (**id_rsa.pub**) and OpenSSH-style private key (**id_rsa**) to connect.

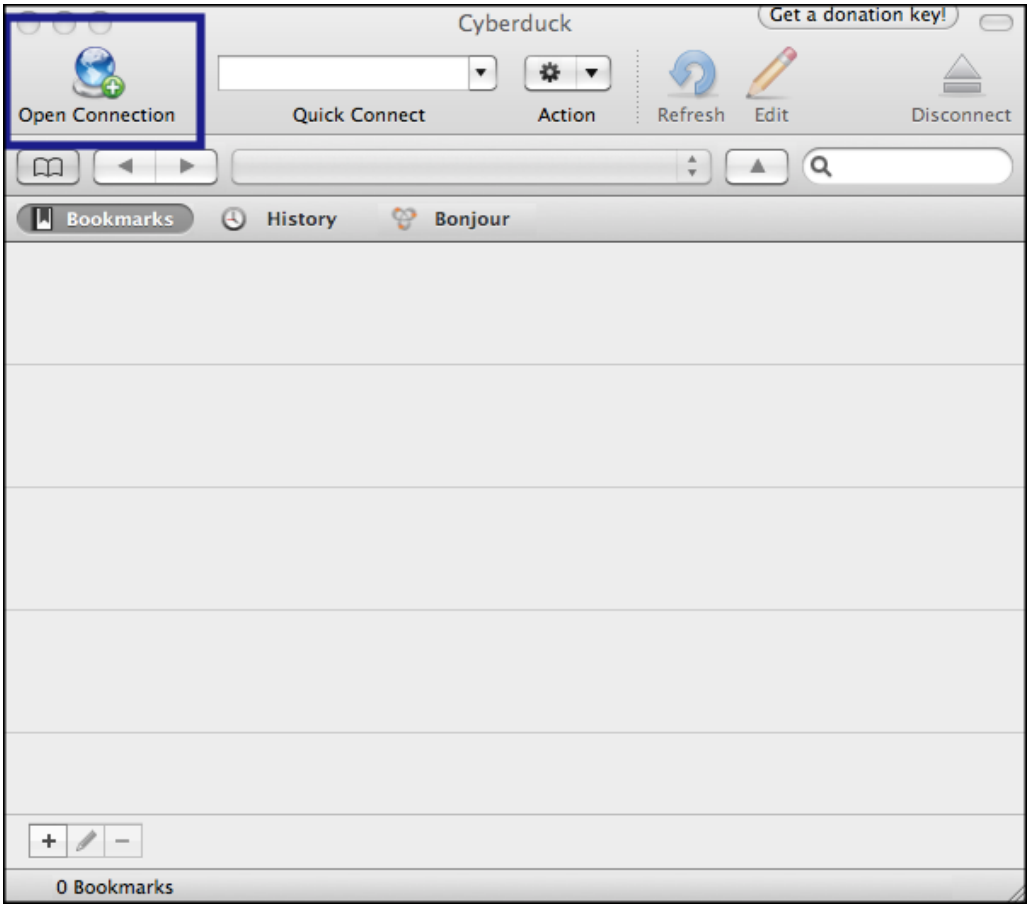
Connect

Steps *To connect to your SFTP account using Cyberduck:*

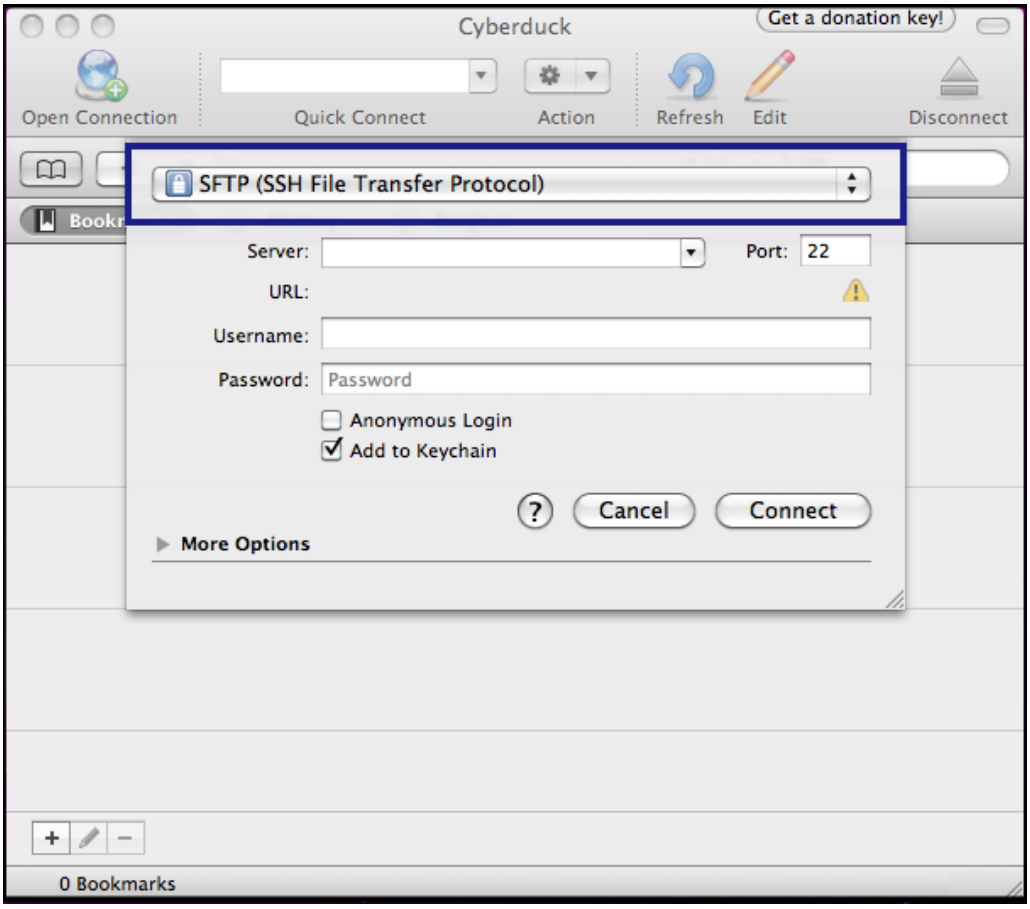
1. Download Cyberduck.
2. After the file has downloaded, select **Open**.



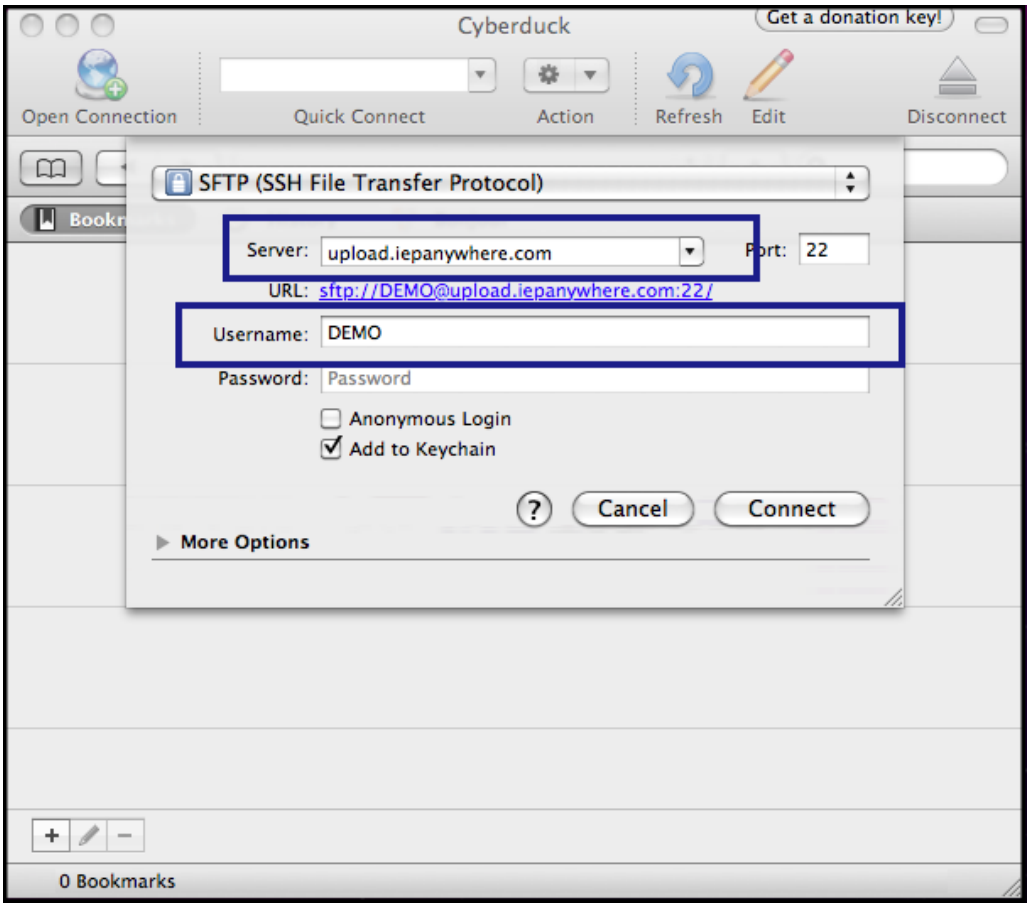
3. Once the program opens, click **Open Connection**.



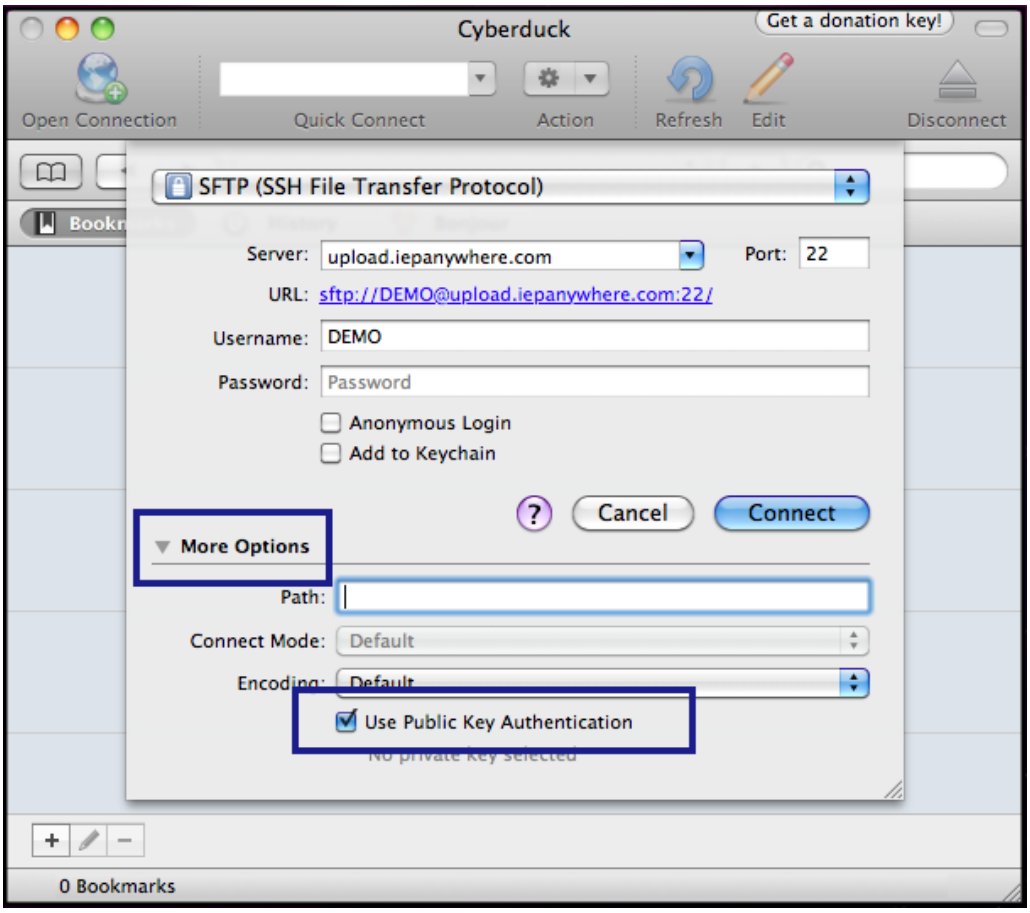
4. Click on the upper dropdown menu and select **SFTP**.



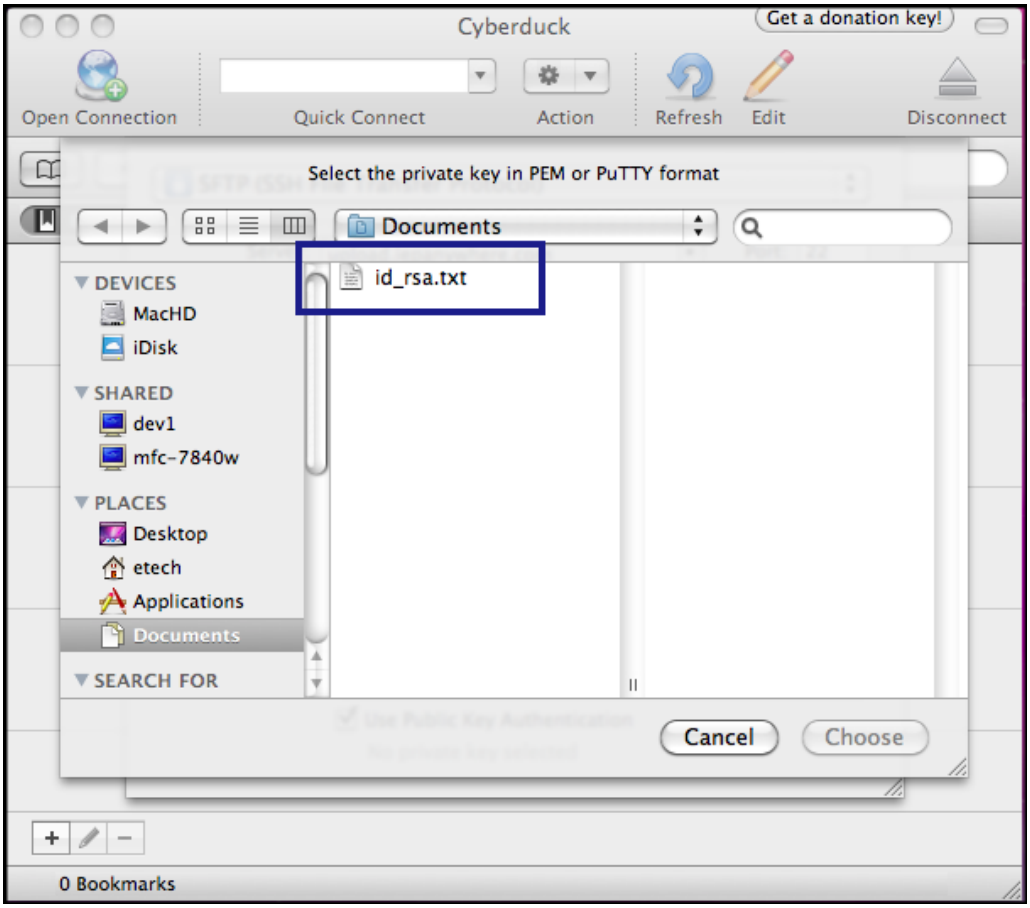
5. Enter the **Host** and **Username**.
    - Host: **sftp.samegoal.com**
    - Username: your district domain



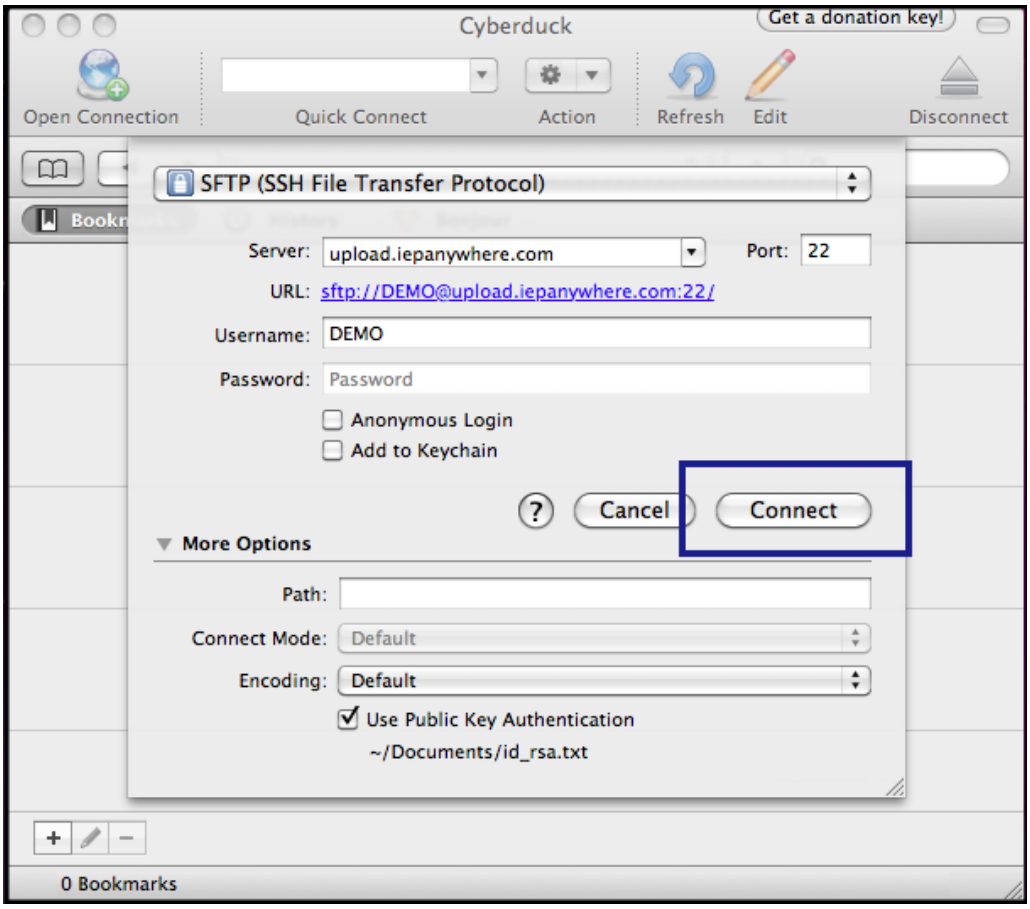
6. Click the arrow next to **More Options**. Check the checkbox next to **Use Public Key Authentication**.



7. Select the text file where you saved your private key.



8. Click **Connect**.



9. The screen below will open. View directories in your SFTP account and transfer files securely as needed.
