

Infinite Campus Demographics Integration - OneRoster

This integration imports student and parent demographics data from Infinite Campus into SameGoal on a nightly basis. Demographics information appears on each student's "Details" tab in SameGoal, and auto-copies into documents as they are created for each student.

Setup

Steps *To setup demographics integration with Infinite Campus:*

In Infinite Campus

Enable a OneRoster Connection to SameGoal

1. Select SameGoal from the **Digital Learning Applications Configuration** tool or by clicking **Add Application**.
2. Expand **OneRoster Connections** and click **Generate New OneRoster Connection**.
3. In the popup that displays, leave **OneRoster 1.2** selected and click **Generate**.
4. Update the Name of the connection to "SameGoal Demographics".
5. Leave *Demographics* selected in the **Data to Share** section.
6. By default, 1.2 connections are scoped to all schools in the district. If desired, expand **Enabled Schools** and select which school should be included in this connection.
7. Fields in the **Information to Share with SameGoal** section will be copied/pasted into SameGoal as detailed below.

In SameGoal

Steps *To setup demographics integration:*

1. Login as an administrator.
2. Visit Settings > District Information.
3. Under the "Infinite Campus" section on this page, click "add Digital Learning Partner Nightly Demographics".
4. Enter connection information generated in Campus as described above. This includes:
 - o Base URL
 - o Access Token URL
 - o Client ID
 - o Client Secret

Tip It may take up to 24 hours for this integration to run. A good way to tell if this integration has run is to visit a student's "Basics" tab in SameGoal. Their "Internal SIS Student Id" should be of format XXXXXXXX-XXXX-XXXX-XXXX-XXXXXXXXXXXX.

Prior SIF

If your district previously used SIF-based demographics integration, remove the SIF-based configuration. If both demographic integration methods are enabled, the SIF-based integration may overwrite OneRoster values, which can cause other integration methods to fail.

Steps *To remove SIF-based demographics integration:*

- In SameGoal:
 - o Visit Settings > District Information > Details.
 - o Under the "Infinite Campus" section on this page, remove "SIF URL".
- In Campus:
 - o Remove the "SameGoal" SIF zone located under System Administration > Data Interchange > Zones.
 - o Remove the "SameGoal" SIF agent located under "System Administration > Data Interchange > Agents.

Tip If your district currently uses outline link-based document viewer integration, it will no longer work after OneRoster demographics integration is configured. Transition to the LTI-based document viewer integration.
