

# **OpenID Connect Identity Provider**

Your district can configure SameGoal to authenticate users against an OpenID Connect Identity Provider (IdP). Many districts use OpenID Connect (OIDC) to manage user authentication across a variety of district applications.

SameGoal supports specification compliant OIDC Identity Providers.

- General OpenID Connect Configuration
- Google OpenID Connect Configuration (Google SSO)
  - Create a new Google API project
  - Set up the consent screen
  - Create an OAuth 2.0 Client ID
- Microsoft Entra OpenID Connect Configuration (Entra SSO)
  - Register a new Microsoft Entra application
  - Copy the OAuth 2.0 Client ID
  - Create a new OAuth 2.0 Client Secret ID
- Enter configuration information into SameGoal

**General OpenID Connect Configuration** 

**Steps** *To configure SSO with any OpenID Connect identity provider:* 

- 1. Configure your external OIDC Identity Provider.
- 2. Log into SameGoal using an administrative account.
- 3. Visit Settings (left menu) > District Information > OpenID Connect / OIDC.
- 4. Enter the Client ID, Client Secret and Issuer URL provided by your IdP.

**Q** Tip SameGoal is not responsible for any fees associated with your use of third party identity providers.

**Q** Tip If your LEA requires some user accounts in SameGoal which do not exist in your OpenID Connect IdP, they can be configured to use a password.

### Google OpenID Connect Configuration (Google SSO)

These instructions can be used to help districts setup Google SSO using OpenID Connect. Google is a common Identity Provider; as a service to clients, SameGoal provides Googlespecific instructions.

**Q** Tip SameGoal is not responsible for any fees associated with your use of Google as an OpenID Connect Identity Provider.

**Q** Tip Google frequently changes their user interfaces; directions may not fully match the current Google interface.

Create a new Google API project

**Steps** To create a new Google API project:

**Q** Tip If you already have a Google Cloud Platform project that you wish to use, you may skip to the next section.

- Log into your Google account.
- Navigate to the Google API Console.
- Select your organization from the menu in the top-left corner.
- In the popup window choose "NEW PROJECT".

• When the activity completes, continue below.

**Steps** To setup the consent screen:

**Q** Tip If you have already configured your Google Credentials Consent Screen, you may skip to the next section.

- Navigate to the Google OAuth Consent Screen.
- Select "Internal" for the application type and click "CREATE".

- In the "App name" field, enter "SameGoal".
- Select a "User support email" (can be an email address or a Google Group email address that you manage).
- In the "Developer contact information" section, enter "help@samegoal.com" into the "Email addresses" field.
- Leave all other fields unchanged and click "SAVE AND CONTINUE".

- In the dialog which displays, copy "Your Client ID" and "Your Client Secret".
- Your Issuer URL will be https://accounts.google.com.
- Enter your configuration information into SameGoal.

### Microsoft Entra OpenID Connect Configuration (Entra SSO)

These instructions can be used to help districts setup Microsoft Entra SSO using OpenID Connect. Microsoft Entra is a common Identity Provider; as a service to clients, SameGoal provides Microsoft Entra-specific instructions.

**Q** Tip SameGoal is not responsible for any fees associated with your use of Microsoft Entra as an OpenID Connect Identity Provider.

**Q** Tip Microsoft Entra frequently changes their user interfaces; directions may not fully match the current Microsoft Entra interface.

Register a new Microsoft Entra application

**Steps** To register a new Microsoft Entra application:

**Q** Tip If you already have a Microsoft Entra Active Directory application that you wish to use, you may skip to the next section.

- Log into your Microsoft Entra account.
- Navigate to the Entra Active Directory console
- In the "+ Add" dropdown choose "App registration".

• When the activity completes, continue below.

Copy the OAuth 2.0 Client ID

**Steps** To copy the OAuth 2.0 Client ID:

- On the Microsoft Entra Default Directory SameGoal Overview Screen, copy the "Application (client) ID".
- This Client ID will later be pasted into SameGoal.

- On the Microsoft Entra Default Directory SameGoal Overview Screen, copy the "Directory (tenant) ID".
- This Tenant ID will later be pasted into SameGoal as the "Issuer URL" formatted as https://login.microsoftonline.com/{directory tenant id}/v2.0.

Create a new OAuth 2.0 Client Secret ID

**Steps** To create a new OAuth Client Secret ID:

- On the Microsoft Entra Default Directory SameGoal Overview Screen, select the "Certificates & secrets" option on the left side.
- On the "SameGoal | Certificates & secrets" page that opens, click the "+ New client secret" button.

• Copy the "SameGoal Client Secret" value.

• This secret value will later be pasted into SameGoal as the "Client Secret".

• Enter configuration information into SameGoal.

#### Enter configuration information into SameGoal

**Steps** To enter configuration information into SameGoal:

- Log into SameGoal using an administrative account.
- Visit Settings (left menu) > District Information > OpenID Connect / OIDC.
- Enter the **Client ID**, **Client Secret** and **Issuer URL** copied above.
- Test logging in.

 $\Omega$  Tip It may take 5 minutes to a few hours for settings to take effect.

Q Tip If you are using Google SSO, the **Issuer URL** should be **https://accounts.google.com** 

**Q** Tip If your LEA requires some user accounts in SameGoal which do not exist in your OpenID Connect IdP, they can be configured to use a password.

## **OIDC Subject Identifier**

The OIDC Subject Identifier is a unique and never reassigned identifier within the Identity Provider for the end user. This case-sensitive string must not exceed 255 ASCII characters. If empty, this field is automatically populated on first use when a user signs into SameGoal via the Identity Provider (IdP).
