samegoal

SameGoal Public Keys

Below are SameGoal's public keys.

Server public key for sftp.samegoal.com

Clients connecting to sftp.samegoal.com using public key authentication (only method allowed by SameGoal) can verify SameGoal server authenticity against the following fingerprints.

```
RSA SHA256:KTJ4j5rslWC7QljmAXrgAQkhbAD09W7VNukISqIqbfs
ECDSA SHA256:w7nHB/1ghQ+e3+vbRJ324Wf1UY+NwbDCD1jqZ57HnOg
ED25519 SHA256:Z75bOJ1RZNqVqdQO/Lg4GhGGJ8kMl9SxerWq2vtc53I
```

Public key used by SameGoal integrations

Some SameGoal integrations access third-party SFTP servers. For increased security public key authentication, as opposed to passwords, is SameGoal's preferred method of SFTP authentication. Our primary public key should be used with most integrations.

```
ssh-ed25519 AAAAC3NzaC1lZDI1NTE5AAAAIHIsCwjNKV+f8i5bN0PWsy+wRSZ03DwlT6gezqPffVyM
```

If your SFTP server does not accept ED25519 public keys you may also use our fallback RSA key.

```
ssh-rsa AAAAB3NzaC1yc2EAAAADAQABAAABgQCbsNeUrk8LsKi0A9ZI2sQaFXje0vmp5iiUYwWx2sLkkyEj2RC
