Public key used by SameGoal integrations

Some SameGoal integrations access third-party SFTP servers. For increased security public key authentication, as opposed to passwords, is SameGoal's preferred method of SFTP authentication. Our primary public key should be used with most integrations.

```
ssh-ed25519 AAAAC3NzaC1lZDI1NTE5AAAAIHIsCwjNKV+f8i5bN0PWSy+wRSZ03DwlT6gezqPffVyM
```

If your SFTP server does not accept ED25519 public keys you may also use our fallback RSA key.

```
