

SG-SFTP

sg-sftp.sh is a script recommended for routine, automatic uploads.

- Supported platforms: Mac™ and Linux™
- Connection requirements: Use your OpenSSH-style public key (**id_rsa.pub**) and OpenSSH-style private key (**id_rsa**) to connect.

Steps *To use SG-SFTP:*

1. Download **sg-sftp.sh**
2. Open a command terminal. Change directory to the location where **sg-sftp.sh** is saved.
3. Run the script from the command line. Example: **jsmith@debian:~/samegoal\$./sg-sftp.sh**
4. Scroll up in the terminal to read the instructions. Enter the prompts.
