Educational Interest

Your user permissions will grant you access to students in different buildings. If you have access to a given building, you will be able to search for any student in that building. However, some student information is hidden unless you have an **educational interest** in the student.

You are considered to have an **educational interest** in a student if you have at least **Can View** access to at least one of their documents.

When you have an **educational interest** in a student, you can:

- View information on their **Deadlines** tab.
- View information on their **Programs** tab.
- View information on their **Team** tab.
- View and make changes to their **Details** tab.
- See their program participation badge next to their name.
- Display their deadlines on your **Deadlines Calendar** by filtering deadlines to **All**, even if the deadlines are not assigned to you.
