samegoal

Program Participation

Special Program participation tracking determines whether (along with key info about how) a student "participates" in a given program at any given time (e.g. Special Education, Section 504, etc.) based on dates and content of completed documentation in SameGoal for any given student.

Tip You can see program participation information for students who you have an educational interest in.

Programs tab

The **Programs** tab appears when you visit a student's page. This tab shows a summary of the programs the student currently participates in as well as any program they previously participated in. It includes the following columns:

- **As Of**: The date that the student's participation status changed.
- **Status Change**: Indicates whether the student is participating, under eligibility review, or exiting the program, as well as any key program information that was updated (such as disability code).
- **Note**: Program notes related to the status change.
- **Determined From:** This was the document that was completed that decided the participation status change.

If there are any incomplete documents that would affect program participation if they were to be completed, they will be listed above the programs table.

Program participation badge

A program participation badge displays throughout the application next to any student when they currently participate in a given program (as determined from the **Programs** tab). This helps users immediately identify students participating in certain programs. On hover, the icon shows basic information about the student's participation as well as upcoming and past due deadlines.

Reports

Students who are no longer participating in a given program might not be included in program reports by default. Before running a report, you may need to update the **Program Enrollment** filter to return the desired results.

Tip State reporting reports do include students who are no longer participating in a given program by default. This is because program data for students who have recently exited a program is still reportable to the state.
